

Roofing Training Course

CrysticROOF Premier BBA Training Course

Glassfibre and Resin Supplies is a Scott Bader approved CrysticROOF BBA Premier Training provider.

CrysticROOF is the leading GRP system of choice for experienced roofing contractors.

The CrysticROOF Premier BBA approved system requires successful completion of a one day training course in order to be registered as an approved installer.

We run this course at our training facility in Rosehill, Ballinacurra, Midleton, Co Cork

The course explains the system in detail and trains the participant in the correct procedures to be followed.

This is done by a mix of talks, visual displays, practical demonstration and a hands-on workshop experience. Each participant will make a small scale roof sample using the Premier system which can be taken away as a demonstration model/sales tool for potential roofing customers.

Course Topics:

- CrysticROOF Standard 10/15 year Material Guarantee .
- CrysticROOF Premier BBA approved 20/25 year System Guarantee.
